Plant Catalog: Enterprise Solution includes a new procedural vegetation library that e-on will update regularly.. Artists will benefit from a redesigned UV mapping algorithm for vegetation models, including the ability to export baked procedural

---

materials to UV maps and UDIMS.. All three solutions bundle a version of VUE and PlantFactory, together with additional benefits depending on the chosen solution: Materials: VUE and PlantFactory are now fully compliant with the PBR metalroughness workflow and includes a Specular to metalroughness converter.. The initial collection comprises 20 totally new vegetation species that ship both in HD (high poly-count) and LD (smaller poly-count footprint) fully textured.. Users will finally be able to export 3D standalone clouds and volumetric cloud layers to other applications as industry standard OpenVDB volumes.. Best of all, since all of this is procedural artists get access to all parameters and can customize everything.. Each species come with an abundance of presets, and each preset comes with its age variations.. Together with its recently unveiled corporate re-branding, e-on software has undertaken a radical twist in the way it operates its business. 0041d406d9 [After Effects Particular Plugin Free Download For Mac](#)
